The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-8, & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Damell 5,490,678 (newly cited).

Darnell shows a planar tripod shaped body, having three arms, and of flexible material. Note that the arms have free ends 20 (figure 4), and a narrow section 21, which acts as a flexible hinge. Also note formation 69, which could be used to connect adjacent bodies. Darnell does not disclose that multiple bodies may be attached to form three-dimensional constructions, but Darnell shows all features claimed, and could be used for this purpose. With regard to claim 2, note that this does not further limit claim 1; a set of 8 bodies would meet claim 2.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Oblack 6.565.404 (newly cited).

Application/Control Number: 10/574,321 Page 3

Art Unit: 3711

Oblack shows a tripod shaped body (figure 14) with a convex shape (column 3, lines 21-32). It would be possible to connect adjacent bodies to form a spherical grid structure; no particular connecting structure is claimed.

Claims 14 & 15 are allowed.

Claims 9-11 & 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
